Subject:	Switch from SCL light to SCL within 3 months		
Date:	2021-06-29		
Implementation:	<table border="1"> <tr> <td>This decision will be published on the website and will also be included in the latest version of the SCL manual.</td> <td>Date of implementation: Immediately</td> </tr> </table>	This decision will be published on the website and will also be included in the latest version of the SCL manual.	Date of implementation: Immediately
This decision will be published on the website and will also be included in the latest version of the SCL manual.	Date of implementation: Immediately		

Decision

If the organization has an SCL Light statement and wishes to obtain an SCL certificate, an additional audit of 60% is sufficient, only when the following conditions are met:

- The additional 60% audit is performed within the 3-month period of the initial 40% audit. (this concerns the 40% audit with which the SCL Light Statement was obtained)
- There are no significant scope changes or organizational adjustments in the organization.
- There is no step increase.

The date of issue of the new certificate will appear on the new certificate.
